

AE2S

Streamlining ACA and benefits administration

Company Overview

AE2S (Advanced Engineering and Environmental Services, Inc.) is a privately-held environmental and civil engineering consulting firm. AE2S specializes in consulting for drinking water systems, wastewater systems, and water resource systems. AE2S also offers civil, structural, and electrical engineering services.

Location: 20+ locations in the Midwest and Rocky Mountain regions

Industry: Engineering

Employees: 200+

“The whole Selerix team is phenomenal. Our Client Service and ACA managers work around the clock and deliver constant communication any time I have a question or concern. I have a great working relationship with both teams, and it truly feels like we’re colleagues in the same company. It doesn’t feel like Selerix is our technology vendor, or that I’m just a client in their book of business – I really feel like they are an extension of our HR department.”

-Susie L., Senior Human Resources Assistant, AE2S

How Does Selerix Support AE2S?

✓ All-in-One Solution

Selerix BenSelect and Selerix ACA allow the AE2S team to manage benefits and ACA from a single platform. With benefits, life events, and demographic information all housed in a single solution, AE2S is able to eliminate time-consuming, risk-laden data exchanges while experiencing the highest levels of data accuracy.

✓ Client Service

The Selerix ACA team works directly with AE2S, leveraging year-round communication to guide AE2S through each stage of the ACA process. The Selerix ACA team coordinates quarterly data reviews aimed at empowering AE2S to proactively assess the health of their ACA data in advance of the ACA filing process. By pairing consistent communication with meticulous timeline management, Selerix ensured AE2S was fully prepared for a stress-free, compliant reporting season.

✓ ACA Automation

In addition to integrated lookback reporting that allows AE2S to monitor and maintain eligibility trends, Selerix ACA automatically generates 1095-C codes based on employee activity that occurs in BenSelect. This powerful feature empowers AE2S to eliminate the time-consuming process of manually generating line 14 codes for each 1095-C eligible employee. In addition to the time and resource savings, AE2S was able to mitigate the risk of data inaccuracies that accompanied manual code entry.

“Selerix ACA has been a critical solution to saving time and money for our organization. The Selerix ACA team makes sure we automatically receive our files and review our data multiple times throughout the year, and Client Services’ turnaround time on communication is phenomenal. Since our data is already housed in the Selerix BenSelect system, our data stays in sync with less chance for error when it’s time for ACA filing.”

-Susie L., Senior Human Resources Assistant, AE2S
