

# Smart Reports

**REAL-TIME DATA.  
GOODBYE, GUESSWORK.**

Traditional report creation is often a cycle of trial and error — add fields, run the report, and hope for the best. Users are left guessing, with limited formatting options and a process that requires more time and expertise than most can spare. Unable to preview the final output while building, users get stuck in a costly cycle of reruns and revisions.

Ready to work smarter, not harder?

## Introducing Smart Reports

A client-inspired solution that eliminates the guesswork of report creation. Smart Reports lets you watch your reports take shape in real-time, with live data viewing and instant formatting at your fingertips. No guesswork or endless adjustments — just efficient, common-sense reporting that saves you time and reduces frustration.

## Key Features Include

### Real-Time Data Preview:

Instantly view employee data as you build — no guesswork required

### Instant Formatting:

Quickly adjust column sizes, rename headers, customize cell colors, and freeze panes — in seconds

### Effortless Drag-and-Drop Creation:

Click and drag data fields with ease using our intuitive interface — no expertise required

### Data Freedom:

Break free from rigid, preset templates and access data fields that matter

### Flexible Interface:

Designed for novice users without alienating super users; access advanced features when you need them
