

# Choose the Right Level of ACA Support

**Not every organization needs the same level of help with ACA Compliance.**

ACA needs are as unique as your workforce. Some employers need full-service management. Others are equipped to handle but still want support against risk. And sometimes the need is purely executional, like accurate filing, on time, without disruption.

**Most ACA providers force those scenarios into a single model. Selerix does not.**

Selerix Modular ACA is designed to meet employers where they are — based on complexity, timing, internal resources, and risk tolerance — without compromising compliance quality.

## Why Selerix Modular ACA?

**Before you compare options, it helps to know who's behind them.**

- Trusted by 1 in 4 employers nationwide
- 97% client retention rate
- \$650 million in mitigated penalties
- 19 million employees tracked
- 7.8 million 1095 forms filed annually
- One ACA provider. Zero outsourcing.

# Modular ACA Options

Choose a solution based on how much complexity you're managing and how hands-on you want to be. Whether you choose full-service management or a more self-directed model, every Modular ACA option is backed by the same compliance foundation.

## Total ACA

**Full-service ACA compliance management for employers who want maximum confidence with minimal internal lift.**

- Selerix assists with strategy, data preparation, review, and execution
- Ideal for complex environments, limited internal resources, or heightened risk sensitivity

## Flex ACA

**A guided, self-service model with built-in compliance guardrails.**

- Employers retain more control, with technical support and user resources
- Designed for equipped teams who want flexibility without risk exposure

## ACA eFile & Delivery

**Execution-focused filing and distribution.**

- Best for employers who have established codes and require assistance with form generation, e-filing, and delivery

# Modular ACA Feature Comparison

## The Selerix Difference in Modular ACA

- One ACA provider. Multiple engagement models.
- Tenured, in-house support options structured around level of need.
- No third-party handoffs or outsourced compliance.
- Flexibility to move as needs change, without starting over.
